0. APPROACH

All the committees have formulated their commission aspiration and objectives on the commission formation sheet. In order to link the input received from January until the end of October 2008 from the Aruban community with regard to the desired outcomes for Aruba in 2025 with the aspiration and objectives formulated by the different commission members, the following group work was done on the different sustainability themes in the four areas underlying sustainable development according to the input received from the community: social, the environment, the economy and governance.

Participants looked for the desired outcomes which Nos Aruba 2025 received as input until the present moment around the room that has to deal with the sustainability themes and wrote them on post-it notes. Afterwards all the desired outcomes were grouped according to which desired outcomes are highly similar.

For every grouped desired outcome group according to similarity a few desired outcomes were formulated resulting in the following desired outcome statements.
